Decentralization, Diversity and Dynamic load regulation

Introducing the 3Diverse project

[3Diverse](#) project will introduce an integrated, multi-sectoral, and multi-level approach to planning and implementing investments in sustainable energy infrastructure. **The 3Diverse sustainable transformation action plan (e.g. Green Transformation) connects different sectors: buildings, energy distribution systems, mobility, and renewable energy production, and empowers local communities to make such plans.** Cross-sectoral cooperation at the local level is a key objective of the

project and to increase the coherence of the energy transition governance by strengthening dialogue with several stakeholders and building the capacity of public authorities to implement activities contributing to national and European energy and climate goals.

The project's long-term objective is to effectively validate the transitioning coal-intensive region of Savinjsko-Šaleška as a highly replicable and scalable model to be implemented in partner regions within and beyond the EU.

The **3Diverse** project has officially started on the **1st of October 2022** under the **Programme for Environment and Climate Action (LIFE)**. The project led by **KSSENA**, the Energy Agency for Savinja, Šaleška, and Koroška, was launched with an overall budget of € 1,450,513.40 and will end on 30th of September 2025.

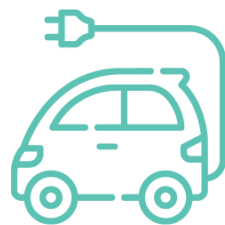

Besides KSSENA consortium consists of three Slovenian partners [Kolektor SetUp](#), [Komunalno podjetje Velenje](#), and [University of Ljubljana \(Faculty of Mechanical Engineering, Faculty of Electrical Engineering\)](#), and 4 associated partners [Municipality of Celje](#), [Municipality of Slovenj Gradec](#), [Municipality of Velenje](#), [Municipality of Šoštanj](#) and [Elektro Celje](#).

Kick-off meeting in Velenje

The Kick-off meeting for the 3Diverse was hosted by project coordinator KSENA on the 6th of October 2022 in Velenje, Slovenia. In addition to the all-project partners, also project officer Ms. Daniela Bachner from the [European Commission](#) attended the meeting.

At the meeting project coordinator presented the project mission, goals, and general overview of the project activities. **Partners introduced themselves, addressed and discussed their roles in the projects, what they want to achieve, and more importantly, proposed timelines and possible challenges that could arise in the early stages of the project.**

Project website is launched

We are more than happy to announce the launch of the project website.

The website will serve as a centralized platform for all types of groups to access information about 3Diverse and its activities and goals.

There will soon be more features and functions added – so stay tuned!

Related news

[The Municipality of Velenje](#) purchased the Stara elektrarna complex from [Premogovnik Velenje](#) at the end of the year 2022. Under the guidelines of the Institute for the [Protection of Cultural Heritage of Slovenia](#), they will start the renovation of the building and establish an industrial-educational park, the Centre of the Future.

The Old Power Station building is unused and has been dilapidated for a long time, but at the same time, it is an architectural jewel in the industrial building heritage. **The Old Power Station will be revitalized as soon as possible and turn it into an industrial and educational park, the Centre of the Future.** Once a generator of electricity, it will become a generator of highly educated human resources, and highly successful innovations in the fields of economy, renewable energies, and environmental protection. The program will be based on three pillars: environment, circular economy, and education.
